PROFESSIONAL SUMMARY

Software and information systems professional with 6.5+ years of experience in full-stack development, ERP and MIS delivery, and enterprise system operations. Currently Software Specialist at BRAC, managing five core digital platforms (including MIS, LMS, facial-recognition attendance, and digital assessment systems), contributing to the modernization of a legacy MIS with approximately 12 years of operational history, and coordinating 10 ICT field staff. Previously delivered ERP solutions, executive dashboards, microservices, CI/CD pipelines, and a cross-platform mobile application with Java/Spring Boot, Angular, and React Native, and served as CMMI Level 3 Project Manager. INTI alumnus: MIT (CGPA 3.88/4.00, 2026) and BSc in Information Technology (Business Intelligence, 2018; Dean's Honor Roll).

TECHNICAL SKILLS

- **Development** Java, Spring Boot, Spring Data JPA, Java EE/J2EE, JavaScript, Angular, React Native, ReactJS
- **Data & Reporting** Oracle, PostgreSQL, MySQL, Flyway, JasperReports, Tableau, Google Sheets, Jupyter, TensorFlow 2.0
- **Enterprise Systems** MIS, LMS administration, ERP implementation, dashboards and reporting, legacy system modernization, attendance device systems
- **Infrastructure** GitLab CI/CD, Apache Tomcat, Nginx, microservices (Eureka, Hystrix), Linux administration, networking fundamentals
- **Project Delivery** CMMI Level 3 project management, requirements analysis, system design, BPMN/Gantt documentation, technical documentation, troubleshooting, stakeholder coordination
- **Automation & Tools** Google Apps Script, Google Forms, Python scripting, Microsoft Office

PROFESSIONAL EXPERIENCE

Software Specialist Mar 2024 – Present
BRAC | Dhaka, Bangladesh

- Manage, maintain, and enhance five core digital platforms (BEP-MIS, BEP-LMS, Tipsoi Face Device System Dashboard, Digital Assessment System, and RF-Indicator) to support system reliability, operational continuity, and ongoing feature improvements.
- Contribute to the ongoing modernization of BEP-MIS, a legacy system with approximately 12 years+ of operational history, to improve user-friendliness, MIS data management, reporting, and information support for programme planning and implementation.
- Coordinate and facilitate 10 ICT field staff, aligning technical support, issue escalation, system implementation, and field-level operations across supported programmes.
- Support attendance operations for 1,267 facial-recognition devices deployed across BRAC's Social Enterprise and Development School networks, coordinating technical issues to sustain reliable attendance monitoring.
- Support operations, reporting, and monitoring on BEP-MIS (coverage: 91,260 students and 3,264 teachers) and BEP-LMS administration (coverage: 27 courses, 394 mentors, and 3,265 trainees), helping stakeholders track programme information and operational performance.
- Maintain and improve applications through troubleshooting, system upgrades, feature enhancements, and documentation to strengthen performance and user experience.
- Collaborate with programme stakeholders and cross-functional teams to gather requirements, identify operational challenges, and deliver system enhancements aligned with organizational needs.

Software Engineer (Java) Mar 2023 – Mar 2024
DEKKO Legacy Group | Dhaka, Bangladesh

- Led ERP module implementation for the Production Unit (plastic and metal buttons) at DEKKO Accessories Ltd., tailoring the solution to specific manufacturing workflows.
- Developed a Chairman Dashboard using Angular 14, Spring Boot, and HighCharts to visualize weekly and monthly apparel production metrics and Defects per Hundred Units (DHU).
- Gathered requirements through field visits and direct user interviews, then designed scalable system architecture around user needs.
- Engineered dynamic JasperReports output (PDF, XLSX, CSV, HTML, XML) for download and file-server integration; built form-driven Angular 14 interfaces (Reactive Forms, nested FormArrays) with flexible Spring Data JPA Criteria Queries.

- Implemented GitLab CI/CD pipelines for Angular and Spring Boot applications; deployed to development and production environments on Apache Tomcat, with custom documentation for internal knowledge transfer.

Programmer Aug 2021 – Feb 2023
Golden Harvest Infotech Ltd. | Dhaka, Bangladesh

- Served as CMMI Level 3 Project Manager for an enterprise Human Resource Management (HRM) system, overseeing end-to-end project delivery and compliance.
- Developed a responsive cross-platform React Native app (iOS and Android) for the Ecomilli project (US-based client), integrating Stripe payments and Socket.IO real-time chat, with state managed via React Redux and Context API.
- Designed the backend architecture of an Activity Monitoring System using Spring Boot microservices, integrating Eureka (service registry) and Hystrix (circuit breaker) for high availability and fault tolerance.
- Built the Property Location Index admin panel (UK-based project) with Angular 13 and Angular Material using reusable components; implemented GitLab CI pipelines automating build, test, and deployment.

Full Stack Software Developer Mar 2020 – Jul 2021
DOER Services Ltd. | Dhaka, Bangladesh

- Developed and maintained a full-stack ERP web application (Angular 11, Spring Boot) used in-house and by 400+ agent points, applying a microservice architecture for modular, scalable design.
- Designed and optimized PostgreSQL databases; migrated data from Google Sheets using Python scripts and Flyway.
- Deployed production applications to live servers with Nginx; set up and managed GitLab CI/CD pipelines for automated testing, deployment, and delivery.
- Automated workflows with Google Apps Script (annotated PDF generation, mass email for 300+ agent points with dynamic attachments, subscription-expiry reminders, a Bootstrap CRUD app on Google Sheets) and built an online training exam system with Google Forms and a secure dashboard with restricted question access.
- Processed and visualized data from 120,000+ agents across 300 points using Google Sheets pivot tables; ran consistency checks and regression analysis with Jupyter, Python, TensorFlow 2.0, and Tableau.
- Documented Inventory Management workflows with Gantt charts, BPMN diagrams, flowcharts, and requirement specifications.

Intern Mar 2019 – Jul 2019
DataSoft Systems Bangladesh Limited | Dhaka, Bangladesh

- Developed Django input forms and modelled MySQL schemas for the WASA Utility Bill Management project; built an interactive ReactJS admin dashboard for managing utility billing operations.
- Performed functional and integration testing across in-house applications, identifying critical bugs before deployment.

EDUCATION

Master in Information Technology (MIT), Information Technology 2026
INTI International University | CGPA 3.88/4.00

Bachelor of Information Technology (Hons), Business Intelligence Systems 2019
INTI International University | CGPA 3.13/4.00 | Dean's Honor Roll Award

CERTIFICATIONS

- Data Visualization with Tableau Specialization (Coursera) 2020
- Fundamentals of Data Visualization in Tableau (Udemy) 2020
- Workforce Recovery Program (Coursera), Bangladesh Computer Council 2020
- The Complete 2020 Web Development Bootcamp, Udemy 2020
- Complete Data Science Bootcamp 2020, Udemy 2020
- CCNA Routing and Switching: Introduction to Networks, INTI International University 2017
- Introduction to Enterprise Resource Planning, INTI International University 2017
- openSAP Cloud Platform Essentials, INTI International University 2017
- Novell Certified Linux Administrator 11, INTI International University 2016

LANGUAGES

Bengali – High proficiency (reading, writing, speaking) | **English** – High proficiency (reading, writing, speaking)
